PROSPECTUS FOR 1863.

NOW IS THE TIME TO SUBSCRIBE. OUR TERMS.

There is a great deal of talk among our co temporaries about the "great rise in the price er," and the necessity for a correspo rise in the price of newspapers. We do not agree with our friends as to the last proposition. It is true that paper has gone up frightfully still on its way But what of that? Publishers have for years had a good time with low-priced paper, and made large profits; and now that times have changed they should pay the enhanced price for paper without whining, and without attempting to get it back out of their subscribers. The in crease in the price of paper will make a differ ence of tens of thousands of dollars to us year y; but we shall not increase the price of the wnger. That will remain as it is. We can afford it. The retail price will continue to be four cents; and our club terms will remain as they always have been. Our subscribers have stuck o us when paper was cheap; and we do not intend to increase our rates to them now when it is dear. "It is a poor rule that won't work both

wave." All our old contributors have been re-engaged for the ensuing year; our corps will be so large and will embrace such a variety of eminent talent, that every department of literature will receive the particular attention of some one competent to do it ample and special justice In fact, our contributors will send vs from weel to week much more matter than we can possi-bly use, so that we shall always have a fresh and superabundant supply from which to select THE

VERY BEST.

The Lenger's great success is owing to the fact that we spare no expense in getting up the Family & Miscellaneous Groceries,
The exalted reputation of its contributors, the practical and invariably pure and healthy character of all its articles, the care which is taken that not even one offensive word shall appear in its columns, and the superiority of its Tales and Sketches, have gained for the NEW YORK LED-GER a position that no literary paper has ever reached

The following are the names of some of our eading contributors for the new year-1863. What other paper ever presented such an array what other paper ever presented such an array of distinguished and popular names:

THE NEW YORK TRIBUNE, 1863.

The New York Tribune, first issued in 1841 now in its twenty second year, has obtained both a larger and more widely diffused circu lation than any other newspaper ever pullished in America. Though it has suffered in common with other journals, from the vol unteering and departure of tens of thousand of its patrons to serve in the War for the Un ion, its circulation on the 6th of Decembe 1862, was as follows:

Daily, Semi-Weekly, Weekly, 148,00 215,375

Aggregate,

Pre eminently a journal of New nd tterature, the Tribune has political co vie tions which are well characterized by the single word Republican, in its hearty adhesio to the great truth that "God has made of on blood all nations of men"—Republican in it assertion of the equal and inalienable rights of all men to "life, liberty, and the pursuit of happiness"—Republican in its steadfast, ear nest, defiant hostility to every scheme and effort of the Slave Power, from the Annexa-cion of Texas to the great Rebellion, to grasp the empire of the New World and wield tae desources of our country for its own aggran dizement-Republican in its hope and trust its faith and effort, that this atrocious Rebel-lion must result in the signal overthrow of its plotters, and the firm establishment of equa-rights and equal laws throughout the whole extent of our country, wherein Liberty and union shall indeed be "one and inseparable"

henceforth and forever. The Tribune devotes attention in calme times, and to some extent in these, to Education, Temperance, Agriculture, Inventions, and whatever else may minister to the spiritual and physical progress and well being of mankind; but for the present its energies and its columns are mainly devoted to the invigoration and success of the War for the Union Its special correspondents accompany every considerable army and report every important incident of that great struggle which we trust is soon to result in the signal and conclusive triumph of the National arms, in the restoration of Peace and Thrift to our distracted and bleeding country. We believe that no other wise can a fuller or more accurate view of the progress and character of this momentous conflict be obtained than through the regular perusal of our columns. And we earnestly solic it the co-operation of all friends of the National cause, which we regard and uphold as that of Universal Humanity, to aid us in extending its circulation.

Scrofula, or King's Evil

is a constitutional disease, a corruption of the blood, by which this fluid becomes visited, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is five from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living disordered or unhealthy food, impure air, fith and filthy habits, the depressing vices, and above all, by the venereal infection. Whitever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition for

their children.

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which me the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on tubercles; in the gianus, swenings; and on the surface, cruptions or sores. This find on-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constinthe energies of life, so that scrofulous constitutions not only suffer from scrofulous constitutions not only suffer from scrofulous onto plaints, but they have far less power to with stand the attacks of other diseases; consequently vast numbers perish by disorder which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and may destructive diseases of the liver, kidneys, briak and, indeed, of all the organs, arise from or are aggravated by the same cause. are aggravated by the same cause.

One quarter of all our people are scrobilous; their persons are invaded by this birking in-fection, and their health is undermined by it. To cleanse it from the system we must removate the blood by an alterative medicine, and a vigorate it by healthy food and exercise. Such a medicine we supply in
